- ☐ the sequence listing part of the description:  
 pages \_\_\_\_\_, as originally filed  
 pages \_\_\_\_\_, filed with the demand  
 pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_

### 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language \_\_\_\_\_ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

### 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims	1-6	YES
	Claims		NO
Inventive step (IS)	Claims	1-6	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-6	YES
	Claims		NO

## 2. Citations and explanations

1. The invention defined in claim 1 complies with the requirements of PCT Article 33(2) to (4) for novelty, inventive step and industrial applicability.
2. Since none of the documents cited in the search report or acknowledged in the introductory portion of the description discloses all the features of independent claim 1, the subject matter of claim 1 is novel.
3. The search report citations do not prompt a person skilled in the art to design a device for directing heated gas onto a plane surface of a workpiece, as per D1, in such a way that the deflector device is arranged in the nozzles, as per the characterizing portion of claim 1. The measure whereby one or more metal strips are uniformly distributed over the periphery of the nozzle and pass in spiral form through the nozzle, the width of the metal strips being adapted to the radius of the nozzle, and whereby the spiralling in the case of n metal strips passes through at least  $(360/n)$  degrees, results from a step which is not a logical development of the cited prior art. The device as per claim 1 therefore involves an inventive step.

4. The subject matter of claim 1 can be used and made and is therefore also considered to be industrially applicable.
5. The dependent claims define advantageous and non-obvious developments of claim 1 and therefore likewise comply with the requirements of PCT Article 33(2) to (4) for novelty, inventive step and industrial applicability.

Certain defects in the international application

6. No closest prior art is cited in the description (PCT Rule 5.1(a)(ii)).
